### DHK Bovi-Flex Bandage

Part number: DHK50072-BFB4-1

#### Description :

The DHK Bovi-Flex bandage is a high quality, cohesive and flexible wrap, widely used in the animal health industry, particularly for bovine applications. Bovi-flex is a soft, lightweight and self-adherent wrap that offer high-tensile strength for maximum support and high-abrasion resistance.

### DHK Calf Feeder Bag

Part number: DHK500136-AFB2L-1

#### Description :

The Calf Feeder Bag has a 2-liter capacity and is designed with detachable parts and threaded joints for easy cleaning. This product utilizes a fluid shut-off valve for controlled liquid dispensing. A zipper top is provided for convenient filling and re-enforced holes for easy handling and hanging. This re-usable Calf Feeder Bag is manufactured using FDA grade materials and is durable in harsh environments.

### DHK Magnet

Part number: DHK50020-1 (0.5" dia. X 2.5" L)

DHK50020-2 (0.5" dia. X 3.0" L)

#### Description :

The DHK Magnet's patented design utilizes FDA approved stainless steel materials. Our product is manufactured with specially designed magnets and separating discs for long term use. The DHK magnet maintains stable magnetic strength and properties over time. The unit is totally sealed and unbreakable in normal use.

## DHK Animal Feeding Nipple

Part number: DHK50021-1

### Description :

The AFN design utilizes state of the art air vent and relief valve (patented) which allows a metered amount of milk based on calf demand. The AFN vent and relief valve allows each calf to reach their potential size and weight. Automated tooling is used to cut nipple and valve diaphragm and thereby, increases product life cycle. The AFN is manufactured using FDA approved materials and has an operating temperature range of -80°F to +180°F.

## DHK Animal Feeding Nipple Bottle

Part number: DHK50029-1

### Description :

The Animal Feeding Bottle is designed for long life cycle. Mirror finish (micro finish 8 or better) will not allow calcium deposits to adhere to the surface and significantly decrease the growth of bacteria. Smooth finish allows for easier cleaning and installation of the nipple. The AFB is manufactured using FDA approved materials and has an operating temperature range of -80°F to +180°F.

## DHK Soft Polyamide Towels

Part number: DHK500183-DPM-1

### Description :

DHK's premium quality Polyamide Towels are FDA compliant with extremely gentle and unique properties to absorb all substances like no ordinary towel. The Microfiber used is a unique and revolutionary type material and is a man-made product that combines two basic fibers, Polyester and Polyamide ( a nylon byproduct). The towel is capable of instantly removing tough dried-in-stains by attracting and absorbing dirt, stains, moisture and other unwanted substances
