NexGenx

Smart Vaccine Management Systems (SVMS) DHK500166-SVMS-1

Features:

- Designed to provide environmental control and stable temperature for hot & cold climate operations
- Four receptacles with auto sealing are provided for large syringes.
- Syringe and needle are protected with specially designed barrel while maintaining low temperature desired.
- Four step receptacles are designed to accept 5ml syringe with an adaptor.
- Internally mounted four position hook assembly supports storing vaccines to provide continuous feed to the 5ml syringe. This provision accelerates medicine administration to a large herd in the shortest possible time.
- No power required.
- Cool packs are included with the system for long maintenance-free life cycles
- The Chest is manufactured utilizing space-age FDA approved composite plastic materials for improved insulating properties and durability.
- Easy carry handle locks for safety
- Designed to withstand transportation shock and vibration
- FDA approved materials
- Dimensions: 13.5" H X 10.5" W X 18.5" L
- Designed capacity: 28qt.
- We provide custom designed systems to suit your requirements including private labeling

All NexGenX Medical products are manufactured in compliance with FDA applicable CFR's, GMP's, WHO, ISO and other applicable standards. We at NexGenX Medical manufacture products to highest quality control standards, efficacy and maintain full traceability with Lot and Batch control.
